DETAILED ACTION

1. This action is in response to the original filing of April 7, 2005. Claims 1-6 are pending and have been considered below.

Claim Objections

2. Claims 1 and 3 are objected to because of the following informality:
 - a. Claim 1 and 3 appear to contain a typographical error. The Examiner believes that the word "to" is omitted between "present[ing]" and "the" in line 7 of claim 1, and line 6 of claim 3.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.

Art Unit: 2174

- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 5 is rejected under 35 U.S.C. 101 because Claim 5 is drawn to a computer program per se. A computer program is not a series of steps or acts and this is not a process. A computer program is not a physical article or object and as such is not a machine or manufacture. A computer program is not a combination of substances and therefore not a compilation of matter. Thus, a computer program by itself does not fall within any of the four categories of invention. Therefore, Claim 5 is not statutory.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2174

5. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Claim 4 recites the limitation "the at least one item" in line 5 of claim 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Khosla et al. (6,202,061.)

Claim 1, 3, 5, 6: Khosla discloses a system for enabling a user to manipulate a user interface to make a selection from a first item and/or a collection comprising a second item, and the system comprises:

- a. generating means conceived to generate a generated-collection (10:11-53; Fig. 8A: 807) that comprises the first item that belongs to the selection (e.g. search results: Fig. 9: 901-905; Fig. 8A:811); and

- b. presentation means conceived to present the user, through the user interface (Fig. 8A: 801), an overview (i.e. layout; 12:9-17) of the generated-collection and/or the collection that belongs to the selection.

Claim 2, 4: Khosla discloses a system for enabling a user to manipulate a user interface according to claim 1,

- a. wherein a selection-criterion (e.g. search parameters/criteria: Fig. 9: 901) defines the selection, the first item is labeled by an item-label (e.g. "Roses": Fig. 8A: 810a), the collection is labeled by a collection-label (Fig. 8C: 805, 810i); and
- b. the generated-collection comprises the first item of which the item-label matches the selection-criterion (Fig. 9: 901: "(e.g., specify picture name ...)"); and
- c. the overview comprises the generated-collection and the collection of which the collection-label matches the selection-criterion (11:8-10.)
